Remarks

31/5/66

The decrease of barometric pressure which commenced on the west coast of Ireland on Tuesday evening, was followed yesterday by a corresponding decrease on the west and south coasts of England, as well as on the northwest coast of France; but on the east coast of Scotland the pressure increased. Last night it blew a gale from SE at places on our southern coast, and this morning the winds generally have become easterly or southeasterly, light to strong.

~~Rain has fallen on the southwest~~
Rain has fallen in the southwest of England and Ireland.

GHS ✓

Rain-fall, snow or hail (melted), since last report.

~~NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.~~

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Remarks 1/6/66

Very heavy rain fell last night in and around London accompanied by some thunder and lightning, but little or none fell on our coasts except at Holyhead. The winds still continue easterly or southeasterly, moderate to strong. Barometers are very unsteady in the south of England, and in the northwest of France they have fallen about two tenths of an inch, whilst in Scotland they have again risen slightly.

In the Mediterranean yesterday the winds were light and variable with a barometric pressure of about 29.9 inches

Remarks

6/6/66

The winds this morning on the English coasts and on the south coast of Ireland are chiefly southwesterly, light to fresh, and southeasterly on the coasts of Scotland. Barometers ~~generally~~ have risen since yesterday, but less in the west of Ireland than in other parts of the British Isles. ~~Temperature generally has not much changed, except at Nairn where there has been a rise of 13°~~ Rain ~~has~~ has again fallen in the south and west of England.

In the northeast of Europe yesterday barometric pressure varied from 30·2 to 30·4 inches and over the Mediterranean, where the winds were light and variable, from 30 to 30·2 inches

ON NORTHERN COASTS

WESTERN

SOUTHERN

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Remarks 11/6/66

Moderate ~~y~~ westerly and southwesterly winds ~~generally~~ prevail on our coasts this morning. Since Saturday barometers have fallen from ~~three to four tenths of an inch in Scotland and from~~ two to ~~three~~ four tenths of an inch on ~~the east coast of England~~ our northern and eastern coasts, and ~~Rain~~ the northward & eastward of this country a still larger ~~has fallen~~ fall has occurred in Scotland and in Ireland as well as ~~at Holyhead, Liverpool, and Scarborough~~ on the western & northern coasts of England.

~~Pressure~~ The winds appear to have a tendency to back or retrograde, the sky is overcast or cloudy and there appears reason to expect unsettled weather during the next few days - with thunder in places.

13/6/66

Remarks

On the south coast of England ~~the winds~~ last night ~~the winds~~ ~~last night~~ ~~from~~ were strong from southwest; ~~but~~ this morning they have become more westerly and moderated. On our northeast coasts the ~~winds~~ are northerly and easterly, light to strong, and ~~on our west coasts~~ on our west coasts northerly and westerly, moderate. Heavy rain has fallen on the east and west coasts of England and thunder is reported from Scarborough. Barometers generally are rising this morning.

On our northern & western coasts the winds are northerly (NE – NW).

The area of comparatively low barometric pressure which existed yesterday near Holyhead has progressed in a northeasterly direction, – to the neighbourhood of Scarborough. ~~Along~~ Near the path of this centre of low pressure the winds appear to have varied ~~most~~ greatly and the fall of rain ~~to have~~ ~~to~~ ~~most~~ to have been ~~most~~ large.

Another area of low barometric pressure existed yesterday near the Gulf of Finland – barometers in that neibourhood having fallen about seven

tenths of an inch since the previous day.

Barometers are now rising but at present different currents of wind are ~~too~~ much intermingled ~~to render~~

Remarks

14/6/66

The winds on our coasts this morning are generally westerly, light to moderate. Barometers have risen since yesterday and temperature has ~~also~~ increased. ~~Rain~~ Some rain fell yesterday on the southeast and east coasts of England and this morning rain is reported from ~~it was raining at~~ Valentia and from Brest. ~~A fresh disruption of weather appears to have commenced in the west of Ireland with backing winds. At Roche~~ To the southward of this country, (at Rochefort L. (ouma) the winds have become northeasterly with ~~a~~ rising barometer (but an overcast sky). On the coast of Norway the barometer is still rather low.

~~No information~~

Rain-fall, snow or hail (melted), since last report.

ON NORTHERN COASTS

WESTERN

SOUTHERN

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Remarks

The decrease of barometric pressure ~~which~~ has continued, in the north, and extended over the whole of the British Isles. The winds ~~on our coasts this morning~~ are still ~~generally~~ chiefly westerly and at present moderate. but an increase of wind from west and northwest, with rain or hail showers, is extremely probable, — for barometric pressure was rather low yesterday over the greater portion of northern Europe and the diminution of pressure on our northern coasts has been considerable. and accompanied by a slight decrease of temperature.

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Valentia	29.67	52	NW	1	6	NW	r o	0.03	2

Remarks

18/6/66

Yesterday there were strong westerly gales on our south and west coasts. Rain has been general, and at Yarmouth the amount has been very large. The weather ~~still~~ continues (though at present moderate) unsettled. Only our western coasts were cautioned on Saturday; ~~but the~~ apparently a caution should ~~apparently~~ have been sent also to the south coast.

The rapid rise of the barometer, which accompanied the wind of yesterday, has been followed by a fresh ~~fall~~ decrease of pressure with backing winds.

At Skuddesnes ~~coast of~~ (Norway) the barometer has fallen to 29.2 inches.

A renewal of heavy weather seems probable: and cautionary telegrams have ~~accordingly~~ been sent to those coasts this morning which received no ~~were not~~ caution on Saturday.

ON NORTHERN COASTS

WESTERN

SOUTHERN

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Remarks

25/6/66

The winds this morning are light and easterly on the south coast of England, and light and variable on our other coasts. Barometer generally are falling a little, and temperature continues ~~has been on~~ high on our coasts ~~out coasts and west coasts~~.

To-day the weather continues fine all round the British Isles.

The winds are light and variable, — but on the coasts of the Channel, & apparently across the Bay of Biscay, moderate easterly winds prevail.

Barometric pressure is diminishing slightly.

Temperature continues high: — to the southward & westward it has increased.

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Leith	29.99	70	N	1	1	NE	b	—	1

Remarks

26/6/66

The weather continues ~~is~~ fine ~~and the winds are~~ with light ~~and chiefly~~ easterly winds on our coasts this morning. Barometer have fallen a little since yesterday and temperature has increased.

Moderate northerly and easterly winds, with fine weather and high barometric pressure, prevailed over the greater portion of Europe yesterday.

At Skuddesnaes (Norway) the barometer rose nearly to 30.7 inches. In the neighbourhood of the Black sea an area of comparatively low pressure (about 29.6 inches) existed.

~~Etc.~~

ON NORTHERN COASTS

WESTERN

SOUTHERN

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

Remarks 27/6/66

On the Scottish coasts this morning the winds are light and variable, on our other coasts they are chiefly ~~generally~~ easterly and light. The sky is generally clear but fog is reported from Valentia and Brest. Temperature has diminished ~~fallen~~ considerably ~~on the west coast~~ the north and west of Ireland but it has continued ~~increased~~ on our more northern and southern coasts. ~~Yesterday it was~~ Barometers generally are slowly falling, and in the neighbourhood of the Bay of Biscay ~~appear~~ are rather lower than elsewhere.

The weather was fine yesterday over the greater portion of western Europe with moderate easterly & northerly winds.

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

ON NORTHERN COASTS

WESTERN

SOUTHERN

EASTERN

NORTHERN = Scotland. WESTERN = Ireland, Wales, and adjacencies. SOUTHERN = English Channel and Bay of Biscay. EASTERN = Eastward England and North Sea.

Barometer corrected and reduced to 32° at sea level. Thermometer exposed in shade. Weather: b.—blue sky; c.—clouds (detached); f.—fog; h.—hail; l.—lightning; m.—misty (hazy); o.—overcast (dull); r.—rain; s.—snow; t.—thunder. Rain-fall, snow or hail (melted), since last report.

28/6/66

Remarks

On our north and east coasts the winds this morning are ~~easterly~~, light ~~to~~ or moderate from the eastward; elsewhere the winds are variable. ~~and light and variable on our other coasts.~~

Temperature generally has decreased slightly, but ~~and~~ in Scotland the ~~and~~ fall has been considerable.

~~the temperature~~

~~Light~~ were thunder storms yesterday on our south and southeast coasts ~~and~~ as well as on ~~at~~ the west coast of France, at Rochefort, where the fall of rain was ~~very~~ large.

The temperature at Nairn is now more than 20° below the temperature at Brest. Barometric pressure is very evenly distributed but in the neighbourhood of the Bay of Biscay it is still rather lower than elsewhere.
